Palestine / Remote

PROFESSIONAL SUMMARY

Senior Lead Mobile Engineer and AI Automation Engineer with 9+ years of experience building, scaling, and shipping production Flutter, Android, and iOS applications used by more than 5 million users. Experienced in Flutter architecture, Dart, BLoC / Cubit, Clean Architecture, modular mobile systems, release governance, production monitoring, analytics integration, growth engineering, AI agents, MCP tools, and automation workflows. Proven track record delivering 300+ production releases, maintaining 99.9% crash-free stability, reviewing 600+ pull requests, reducing release cycles from 4 weeks to 1 week, and leading engineering teams to deliver scalable mobile products.

TARGET ROLES

AI Automation Engineer, Senior Flutter Engineer, Lead Mobile Engineer, Flutter Architect, Mobile Architect

CORE TECHNICAL SKILLS

Mobile Engineering

Flutter, Dart, Android, iOS, BLoC, Cubit, State Management, Clean Architecture, Modular Architecture, Mobile Architecture, Performance Optimization, Push Notifications, REST APIs, Firebase Messaging

AI Automation

AI Automation, AI Agents, Agentic Workflows, MCP, MCP Servers, n8n, Make, CopilotKit, Agno, AI-assisted Development, Vibe Coding, Reusable AI Workflows

Release and Quality

Release Governance, Staged Rollouts, App Store Connect, Google Play Console, Firebase Crashlytics, Production Monitoring, Bug Triage, Hotfixes, Release Checklists, Feature Quality, CI/CD, GitHub Actions, Fastlane

Analytics and Growth Engineering

Firebase Analytics, PostHog, MoEngage, WebEngage, Adjust, Event Tracking, Event Taxonomy, A/B Testing, Attribution, Lifecycle Events, Growth KPIs, Campaign Attribution

Leadership

Technical Leadership, Team Leadership, Engineering Mentoring, PR Reviews, Code Review, Architecture Decisions, Cross-functional Collaboration, Agile, Scrum

PROFESSIONAL EXPERIENCE

Senior / Lead Mobile Engineer

March 2020 - Present | Remote

iStoria - EdTech / English Language Learning

Website | App Store | Google Play

- Led mobile architecture and delivery for a scalable Flutter codebase serving 5M+ users across Android and iOS.
- Owned release governance, staged rollout decisions, post-release monitoring, hotfix planning, and production quality.
- Led a 4-engineer squad, reviewed code, guided implementation decisions, mentored developers, and improved engineering standards.
- Delivered 300+ production releases while maintaining 99.9% crash-free stability using Firebase Crashlytics and production monitoring workflows.
- Reviewed 600+ pull requests across a 50+ module codebase and supported scalable implementation decisions across multiple product areas.
- Reduced release cycle from 4 weeks to 1 week by improving release workflows, quality checks, staging processes, and engineering ownership.
- Integrated analytics, attribution, and marketing automation tools including MoEngage, WebEngage, PostHog, Adjust, Firebase Analytics, and Firebase Crashlytics.
- Implemented event tracking, A/B testing support, attribution flows, lifecycle events, and growth KPI tracking to connect engineering work with business outcomes.

- Collaborated with product, growth, marketing, and QA teams to deliver user-facing features, improve app quality, and protect product performance metrics.

AI, AUTOMATION AND DEVELOPER PRODUCTIVITY

- Created custom AI agents and project-specific workflows using Agno, CopilotKit, and agentic development patterns.
- Built automation workflows using n8n and Make to improve execution speed, repeatable operations, and developer productivity.
- Created reusable project architecture assets including plans, hooks, skills, instructions, and AI-assisted engineering workflows.
- Created and connected MCP tools and MCP servers to integrate AI workflows with external systems and project-specific operations.
- Used AI-assisted development and vibe coding to build, improve, and contribute to open-source tools faster while maintaining engineering quality.

SELECTED PROJECTS

iStoria - EdTech English Learning Mobile App

- Role: Senior / Lead Mobile Engineer
- Scale: 5M+ users, 300+ releases, 99.9% crash-free stability, 50+ modules
- Technologies: Flutter, Dart, BLoC, Cubit, Firebase, Crashlytics, PostHog, MoEngage, WebEngage, Adjust, App Store Connect, Google Play Console
- Impact: Improved release speed, product stability, analytics quality, growth tracking, and cross-functional delivery for a large-scale mobile product.

AI Automation and Agentic Developer Workflows

- Role: AI Automation Engineer / Technical Lead
- Technologies: AI Agents, MCP, MCP Servers, n8n, Make, Agno, CopilotKit, reusable workflow instructions, AI-assisted development
- Impact: Built reusable automation assets and AI-assisted engineering workflows to improve developer productivity and project execution speed.

IMPACT HIGHLIGHTS

- 9+ years production mobile engineering experience
- 5M+ mobile users reached
- 4 engineers led and mentored
- 50+ mobile modules owned
- 300+ production releases delivered
- 600+ pull requests reviewed
- 99.9% crash-free production stability
- Release cycle reduced from 4 weeks to 1 week

EDUCATION

Bachelor of Science in Computer Science - Islamic University | Graduated: 2018

LANGUAGES

Arabic: Native / Bilingual Proficiency

English: Professional Working Proficiency

ATS KEYWORDS

AI Automation Engineer, Senior Flutter Engineer, Lead Mobile Engineer, Flutter Architect, Mobile Architect, Flutter, Dart, Android, iOS, BLoC, Cubit, Clean Architecture, Modular Architecture, Firebase, Crashlytics, Firebase Analytics, PostHog, MoEngage, WebEngage, Adjust, A/B Testing, AI Agents, MCP, MCP Servers, n8n, Make, CopilotKit, Agno, Technical Leadership, Release Governance, Staged Rollouts, Production Monitoring, CI/CD, GitHub Actions, Fastlane
