PROFESSIONAL SUMMARY

Senior Flutter and Mobile Engineering Lead with **9+ years** of experience building, scaling, and shipping production Android and iOS applications used by **5M+ users**. Specialized in Flutter architecture, Clean Architecture, modular systems, release governance, production monitoring, analytics integration, and engineering leadership. Delivered **300+ production releases**, maintained **99.9% crash-free stability**, reviewed **600+ pull requests**, and reduced release cycles from 4 weeks to 1 week. Experienced in AI-assisted developer productivity and automation workflows using MCP, n8n, Make, Agno, and CopilotKit.

KEY ACHIEVEMENTS

Responsibility / Achievement	Result
9+ years in production mobile engineering	Strong senior-level engineering background.
5M+ users reached across Android and iOS	Experience with large-scale consumer products.
300+ production releases delivered	Strong release ownership and delivery discipline.
99.9% crash-free production stability	Proven focus on quality and monitoring.
600+ pull requests reviewed	Strong code review and engineering standards experience.
Release cycle reduced from 4 weeks to 1 week	Clear operational and delivery improvement.
Led and mentored 4 engineers	Demonstrated technical leadership.
Owned 50+ mobile modules	Strong modular architecture exposure.

CORE EXPERTISE

■ Mobile Engineering

Flutter · Dart · BLoC · Cubit · Clean Architecture · Modular Architecture · State Management · Performance Optimization · Push Notifications · REST APIs · Firebase Messaging · Android · iOS

■ Architecture & Engineering Quality

Mobile Architecture · Scalable Codebases · Release Governance · Staged Rollouts · Production Monitoring · Bug Triage · Hotfix Strategy · Release Checklists · CI/CD · GitHub Actions · Fastlane

■ Analytics, Growth & Product Engineering

Firebase Analytics · PostHog · MoEngage · WebEngage · Adjust · Event Tracking · A/B Testing · Attribution · Lifecycle Events · Growth KPIs · Campaign Attribution

■ AI Automation & Developer Productivity

AI Agents · Agentic Workflows · MCP · MCP Servers · n8n · Make · CopilotKit · Agno · AI-assisted Software Development · Reusable Engineering Workflows

■ Leadership & Collaboration

Technical Leadership · Team Leadership · Engineering Mentoring · PR Reviews · Code Review · Architecture Decisions · Cross-functional Collaboration · Agile · Scrum

PROFESSIONAL EXPERIENCE

Senior / Lead Mobile Engineer

iStoria — EdTech / English Language Learning

March 2020 – Present

Remote

Led architecture and delivery of a modular Flutter codebase serving 5M+ users across Android and iOS. Owned release governance, staged rollouts, post-release monitoring, and hotfix strategy to protect production quality. Led a 4-engineer squad, reviewed implementation decisions, mentored developers, and improved engineering standards across a 50+ module codebase.

Responsibility / Achievement	Result
Delivered 300+ production releases using structured release workflows and monitoring.	Maintained 99.9% crash-free production stability.
Redesigned release workflows, staging ownership, and quality checks.	Reduced release cycles from 4 weeks to 1 week.
Reviewed 600+ pull requests across product and architecture areas.	Improved engineering consistency and scalable implementation quality.
Integrated MoEngage, WebEngage, PostHog, Adjust, Firebase Analytics, and Crashlytics.	Improved analytics quality, attribution visibility, and growth tracking.
Implemented event tracking, A/B testing support, lifecycle events, and KPI tracking.	Connected engineering delivery with product and business outcomes.
Collaborated with product, growth, marketing, and QA teams.	Delivered user-facing features while protecting performance and quality metrics.

AI AUTOMATION & DEVELOPER PRODUCTIVITY

Created custom AI agents and project-specific engineering workflows using Agno, CopilotKit, MCP tools, and agentic development patterns. Built automation workflows using n8n and Make to improve repeatable operations, developer productivity, and execution consistency. Created reusable project assets including plans, hooks, skills, instructions, and AI-assisted development workflows.

Area	Contribution
AI Agents	Created custom AI agents for project-specific engineering workflows using Agno and CopilotKit.
MCP Tools	Built and connected MCP tools and MCP servers to integrate AI workflows with external systems.
Workflow Automation	Built automation workflows using n8n and Make to improve repeatable operations.
Developer Productivity	Created reusable instructions, plans, hooks, skills, and AI-assisted workflows.

SELECTED PROJECTS

iStoria — EdTech English Learning Mobile App

Role: Senior / Lead Mobile Engineer

Scale: 5M+ users · 300+ releases · 99.9% crash-free stability · 50+ modules

Technologies: Flutter · Dart · BLoC · Cubit · Firebase · Crashlytics · PostHog · MoEngage · WebEngage · Adjust · App Store Connect · Google Play Console

Impact: Improved release speed, production stability, analytics quality, growth tracking, and cross-functional delivery for a large-scale mobile product.

AI Automation and Agentic Developer Workflows

Role: AI Automation Engineer / Technical Lead

Scale: Reusable workflows · MCP servers · AI agents

Technologies: AI Agents · MCP · MCP Servers · n8n · Make · Agno · CopilotKit · AI-assisted Software Development

Impact: Built reusable automation assets and AI-assisted engineering workflows to improve developer productivity and project execution speed.

EDUCATION & LANGUAGES

Bachelor of Science in Computer Science

Islamic University · Graduated 2018

Arabic — Native / Bilingual Proficiency

English — Professional Working Proficiency

Available for Remote Senior Flutter, Lead Mobile, Mobile Architect, and AI Automation Engineer roles.
